

# Dust Mop Treatment

Stearns *Dust Mop Treatment* traps and holds dust in your dust mop or cloth. It helps prevent scattering and resettling, giving your mop many times its dust holding capacity.

Sprinkle or spray *Dust Mop Treatment* on the cloth or directly onto the mop. There is nothing to mix or measure.

Use *Dust Mop Treatment* on tiles, concrete, wood and stone floors. It can also be used on finished surfaces. Use *Dust Mop Treatment* in warehouses, plants, offices, schools and institutions.

*Dust Mop Treatment*  
ST-1263, 1 gallon

ST-No.	Size	Case Weight
ST-1263	4 x 1 gallon	29 pounds

## Directions

Mops should be thoroughly cleaned with a detergent-based cleaner, rinsed completely and allowed to dry. Apply *Dust Mop Treatment* by spraying the chemical on the mop using a trigger sprayer, or immerse the mop into *Dust Mop Treatment* (squeeze excess treatment by wringing). For best results, allow the mop to dry thoroughly before using. A good procedure is to prepare the mops the night before and use them the next day. This procedure should be followed for optimum results.

## Chemical Characteristics

<b>Abrasive</b> .....no	<b>Fragrance</b> ..... aromatic
<b>Corrosive</b> .....no	<b>Appearance</b> .....clear white liquid
<b>Non-flammable</b> ...yes	<b>Phosphate-free</b> ...yes

## Ingredients

The primary ingredient in *Dust Mop Treatment* is a mineral seal oil and a dust capturing agent.
